

HACTONICS-UAUO

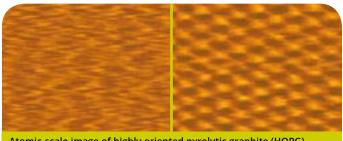

ACTIVE VIBRATION ISOLATION DESKTOP UNIT

ACTIVE VIBRATION ISOLATION DESKTOP UNIT:

HALCYONICS_NANO

The halcyonics_nano series consists of two ultra-compact active vibration isolation systems: namely, the Nano_20, which is the world's smallest active isolation system, and a slightly larger version, the Nano_30. The Nano systems are designed such that they are ideal for small and light-weight applications. One very good example is the use of these with entry-level atomic force microscopes. The system does not require any load adjustment. Once the transportation lock is released, the isolator is ready to be used. No further action is required from the users.

Atomic-scale image of highly oriented pyrolytic graphite (HOPG) without and with active vibration isolation

Because of its design simplicity, the price of the **Nano** series is very affordable. In addition, the **Nano** systems have a small external controller. A major advantage of this is the isolator does not generate heat.

This is important for heat critical applications and applications that are used inside an acoustic enclosure. Potential EMC interferences coming from the electronics are minimized, as the controller can be placed away from the application.

One accessory to our active vibration isolation systems are specially designed welded support frames. These frames feature a high horizontal and vertical stiffness and are the ideal basis for the optimal isolation performance of our systems. Different sizes of support frames are available to meet the requirements of our customers.

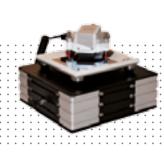

ACCESSORTES AND OPTIONS

- Steel support frame
- Acoustic enclosure
- Metric mounting holes in top plate (M6 tapped holes on 25 mm centers)
- ☐ Imperial mounting holes in top plate (¼"–20 tapped holes on 1" centers)

SELECTED APPLICATIONS

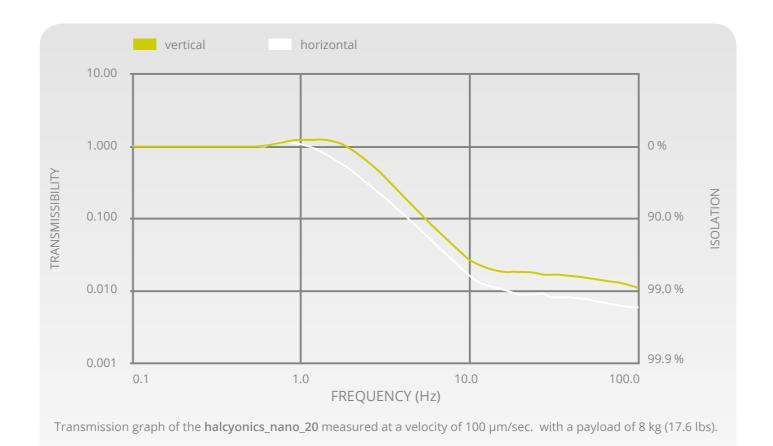

■ Atomic Force Microscope on Nano_20

Nano_20 with Acoustic Enclosure_200

■ Nanosurf Mobile S on Nano_20

■ Bruker Multimode on Nano_20

KEY FEATURES:

- Active vibration isolation starts at 1 Hz (passive isolation above 200 Hz).
- Isolation in all six degrees of freedom.
- Ultra-compact and portable.
- External control unit.
- Easiest handling no tuning or load adjustment required.
- Provides better vibration isolation (> 99.0 % isolation above 15 Hz) than large optical tables.
- Ideal for small and light-weight applications.

- No natural low frequency resonance and, as a result, excellent vibration characteristics also in frequency ranges below 5 Hz.
- No compressed air supply is needed, AC power from an electrical outlet is sufficient.
- Excellent position stability and stiffness.
- Two-year warranty.
- Moderate pricing.
- Long term tests and quality control procedures.

PLEASE CONTACT US FOR FURTHER INFORMATION!

NANO_20

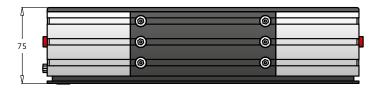

204 mm × 204 mm × 69 mm 8.0" × 8.0" × 2.7"

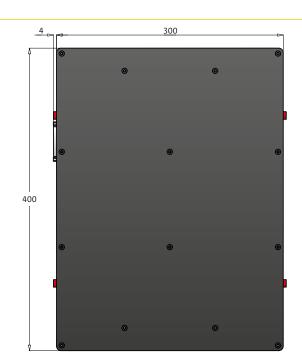

NANO_30

400 mm × 300 mm × 75 mm 15.7" × 11.8" × 2.9"

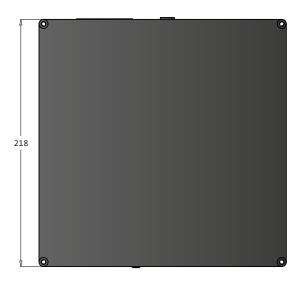

NANO_CONTROL

218 mm × 218 mm × 86 mm 8.6" × 8.6" × 3.4"

SPECIFICATIONS	NANO_20	NANO_30
Dimensions	204 × 204 × 69 mm 8 × 8 × 2.7 inch	400 × 300 × 75 mm 15.7 × 11.8 × 2.9 inch
Load capacity	0 – 8 kg / 0 –17.6 lbs	5 – 25 kg / 11– 55 lbs or 10 – 30 kg / 22 – 66 lbs
Weight	Isolator: 5.6 kg / 12.6 lbs Control Unit: 2 kg / 4.4 lbs	Isolator: 11.3 kg / 24.9 lbs Control Unit: 2 kg / 4.4 lbs
Isolation technology	Halcyonics_nano control technology based on piezoelectric type acceleration pickup, fast signal processing and electro-dynamic force transducers.	
Control electronics	External control unit.	
Force directions	Active compensation in all six degrees of freedom.	
Isolation performance	> 5 Hz = 23 dB (93.0 %) > 15 Hz = 40 dB (99.0 %)	
Active bandwidth	1.0 – 200 Hz* (passive isolation beyond 200 Hz)	
Settling time	300 ms**	
Stroke of the actuator	1 mm	
Max. correction forces	Vertical ± 8 N Horizontal ± 4 N	
Max. compensation level	55 μm/sec. at 2 Hz and 8 kg / 17.6 lbs**, 350 μm/sec. at 6 Hz and 8 kg / 17.6 lbs**	
Environmental and operational requirements	Electrical voltage: $100 - 250 \text{ V} \sim /47 - 63 \text{ Hz}$ Power consumption: Typically $30 - 50 \text{ W}$ Operating temperature: $16 - 40 \text{ °C} / 61 - 104 \text{ °F}$ Relative humidity: $0 - 60 \text{ %}$ Operating altitude: $< 2,500 \text{ m} / 8,100 \text{ ft}$	
Electrical safety	CE certified according to directive 2006/95/EC	
EMC	CE certified according to directive 2004/108/EC	

^{*}Floating table top is supported by steel springs; low-pass characteristics of spring-mass combination dominates the dynamic behaviour above 200 Hz.

^{**}The settling time and maximum compensation level depend on several conditions, such as payload, frequency, load distribution and height of the payload. For that reason this value should be considered as an estimation.
